

**International Seminar
GEOSYNTHETICS INDIA' 08
19-21 November 2008
Hyderabad (Andhra Pradesh)
INDIA**

INTRODUCTION

Geosynthetics are now being increasingly used the world over for every conceivable application in civil engineering, namely, construction of dam embankments, canals, approach roads, runways, railway embankments, retaining walls, slope protection works, drainage works, etc. due to its inherent qualities.

To be abreast with the latest development in the field of Geosynthetics, an International Seminar “**Geosynthetics India'08**” is being organised by the Indian Chapter of International Geosynthetics Society and the Central Board of Irrigation & Power (CBIP).

TOPICS

The following will be the topics for discussion during the seminar:

1. New Geosynthetics Materials
2. Testing & Evaluation, Specifications and Standardization
3. Reinforced Soil Structures
4. Soil Slopes and Landslide Mitigation
5. Filtration and Drainage
6. Roads and Railways
7. Hydraulic Structures
8. Landfills and Ash Ponds
9. Erosion Control
10. Ground Improvement
11. Natural Fibre Geotextiles
12. Hill Area Development

CALL FOR CASE STUDIES

Case studies on the topics proposed and allied topics are invited. Intending authors may send the full text of their case studies, as per the guidelines given below. **The last date for the receipt of full texts of the case studies is 16 August 2008.**

The case studies will be reviewed by the Technical Committee as to their suitability for presentations.

The case studies accepted for presentation will be notified by 15 September 2008. A condition of acceptance of case studies will be that the author, or one of the authors in case of multiple authors, will attend the seminar and make the presentation.

The case study shall contain:

- a descriptive, but brief title
- title, name(s) and affiliation of the author(s)
- address for correspondence (including fax numbers and e-mail addresses)
- detailed information about the objective, methods, results and conclusion, to enable a correct appraisal of the suitability of the proposed case study for the seminar
